

OTTO Product Change Notification

CHANGE NOTIFICATION #: 04132020
ISSUE DATE: April 13, 2020
PRODUCT(S) AFFECTED: P9 and LP9 Series
EXPECTED EFFECTIVE DATE: June 15, 2020

Dear Valued OTTO Customer:

The purpose of this Product Change Notification (PCN) is to inform you of a change to the standard, catalog codable P9 and LP9 series pushbutton switches. Please review this information in detail. Should you have any questions or require any additional information please contact your OTTO Regional Sales Manager or call us at (847) 428-7171 or email us at info@ottoexcellence.com.

Description of Change:

The electrical ratings of the standard, catalog codable P9 and LP9 series switches will be changed, as follows:

- The inductive load specification is being eliminated.
- The 28VDC resistive load specification is changing **from** 5A (NO/NC) and 4A (2 Circuit) **to** 3A (NO/NC and 2 Circuit).
- The AC rating is changing **from** 115VAC 60/400 Hz **to** 115VAC 60Hz.
- The 115VAC resistive load specification is changing **from** 5A (NO/NC) and 4A (2 Circuit) **to** 1A (NO/NC and 2 Circuit).
- UL recognition and CSA certification are being removed from these two series.

All other specifications are unchanged.

Impact on OTTO Customers:

The electrical rating changes **only** impact standard, catalog codable P9 and LP9 series switches (custom parts are unchanged). Should customers need the higher electrical ratings we can direct them to a custom part number or they can purchase a P7-D.

Validation Testing Performed:

The new P9 and LP9 switches have been fully tested and pass all validation test requirements.

Effective Date:

The changes will affect all standard P9 and LP9 switches shipped on or about 6/15/2020 and onward.
